

STEWARTAUDIO

AV Series AV30MX-2

AV30MX-2

Owner's Manual October 2010

Important Safety Instructions

Before using your Stewart Audio Inc. Power Amplifier, please read this **Owner's Manual** carefully to ensure optimum trouble-free performance.

WARNING: TO REDUCE THE RISK OF ELECTRICAL SHOCK, DO NOT EX-POSE THIS AMPLIFIER TO RAIN OR MOISTURE. DANGEROUS HIGH VOLTAGES ARE PRESENT INSIDE THE ENCLOSURE. DO NOT OPEN THE CABINET. REFER SERVICING TO QUALIFIED PERSONNEL ONLY.

CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER-SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

The lighting bolt within arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of un-insulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electrical shock to person.

The exclamation point within an equilateral triangle, is intended to alert the user to the presence of important operating and maintenance (servicing) instruction in the literature accompanying the appliance.

Important Safety Instruction – Please Read Prior to Product Installation.

- 1. Installation should be performed by a trained and licensed professional to insure safe and lasting operation.
- 2. All of the safety and operating instructions should be read before the amplifier is installed or operated. Retain these instructions for future reference. All instructions should be followed; all warnings on the amplifier and in the operating instructions should be adhered to.

- The amplifier should be situated so that its location and position does not interfere with its proper ventilation. For example, the amplifier must not be placed on a rug, bed, sofa or similar surface that impedes airflow across the chassis. Airflow through the ventilation openings should be unobstructed.
- 4. This amplifier should not be used near water, for example, near a bathtub, in a wet basement, near a swimming pool, etc. This amplifier is intended to be operated in a controlled indoor environment.
- 5. Do not place the amplifier near heat sources such as radiators, heat registers, stoves, or other appliances that produce heat.
- 6. The amplifier should only be connected to 120 VAC, 60 Hz power supply. Do not defeat the ground or polarization of the power plug.
- 7. Route power cord and other cables so that they are not likely to be walked on, tripped over or stressed. Pay particular attention to condition of cords and cables at plugs and at the point where they exit the amplifier. To prevent risk of fire or injury, damaged cords and cables should be replaced immediately.
- 8. Clean the amplifier with a clean, damp cloth. Do not use solvents or abrasive cleaners. Never pour any liquid on the amplifier.
- 9. When left unused for a long period of time, the power cord should be unplugged form the outlet.
- Damaged Amplifiers requiring service should be repaired by a qualified service technician when:
 - a. The power cord or AC plug has been damaged.
 - b. Objects have fallen, or liquid has spilled into the unit.
 - c. The amplifier has been exposed to rain or other moisture.
 - d. The amplifier does not appear to operate normally or exhibits a marked change in performance.
 - e. The amplifier has been dropped or the enclosure damaged.
- 11. The user should not attempt to service the amplifier beyond that described in the operating instructions. All other servicing should be referred to qualified service personnel.

This amplifier proudly designed and manufactured in the USA.

1 Welcome

Congratulations on the purchase of your new Stewart Audio AV Series power amplifier. This amplifier has been designed and built to provide you with years of high-quality audio performance and trouble-free operation. If after reading this manual you should have any questions concerning amplifier installation and operation, please contact your Authorized Stewart Dealer, or you may contact us directly using the contact information provided on the back of this manual.

1.1 Features

Your Stewart Audio AV Series amplifier is the result of years of experience in the design and manufacture of quality amplifiers. As such it provides a combination of performance and operational benefits that simply cannot be found in conventional amplifiers.

- Sub Compact 1/4 rack package
- Two channel stereo amplifier with built-in mixing capabilities
- Optimized to drive 4 and 8 ohm loads.
- Music and fire alarm muting
- Clean full-range dynamic power
- Signal Detect trigger for sleep & wake up
- Multiple mounting options
- External inline power supply
- Class D convection cooled

1.2 Using this Manual

In order to obtain maximum performance from your AV Series Amplifier, please take time to read this brief owner's manual and carefully follow the guidelines for connection and operation.

This manual provides you with the information necessary to safely install and operate your new AV Series amplifier in the most common scenarios. If you find yourself requiring additional assistance, please feel free to contact your Authorized Dealer, or you may contact us directly using the information provided on the back of this manual.

2 Setup

2.1 Setup Precautions

CAUTION: Before installing your amplifier, make sure that you have read the Important Safety Precautions at the beginning of this manual.

2.2 Amplifier Installation

The AV30MX-2 incorporates a number of different mounting options in order to fit your installation needs.

2.2.1 Pole-Mounting

The AV Series of amplifiers is Stewart Audio's first line of polemountable amplifiers. The AV30MX-2 has mount holes on both the top as well as the side of the unit which can be used with the AV-Pole bracket available from Stewart Audio.

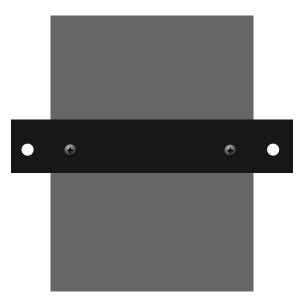

Part Number: AV-Pole

2.2.1 Universal-Mount Installation

The AV30MX-2 also has a universal bracket available which allows the unit to be mounted against a wall or under a table. Two screws are included in the kit which will affix the bracket to the top or the side of the unit. Once this is done, two holes are available for mounting the unit where desired.

Part Number: AV-Bracket

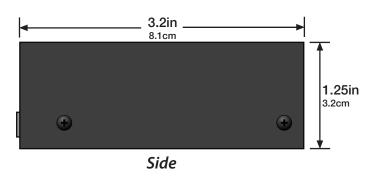

CAUTION: Use only the screws provided in mounting brackets to the amplifier. Do not overtighten.

2.2.3 Product Dimensions

Front

2.3 Proper Cooling Considerations

Because the AV30MX-2 regulates its temperature using convection cooling and no fans, the amplifier must be given adequate space to allow for proper airflow. Do not stack the amplifiers on top of each other or mount it in a way that other equipment will block airflow through the case.

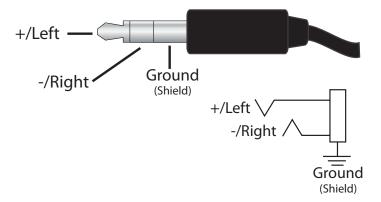

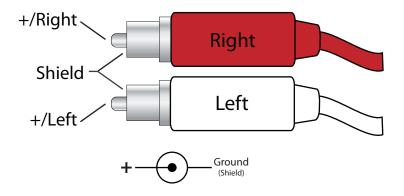

CAUTION: Inadequate airflow to the amplifier can cause the amplifier to overheat and potentially become damaged in the process. Be sure to provide plenty of air space to allow for convection cooling.

2.4 Input Connections

Your AV30MX-2 includes two independent stereo inputs which are then mixed into the final output. Channel 1 will accept a stereo 3.5mm jack while Channel 2 will accept stereo RCA phono plugs. Both inputs should be stereo, unbalanced, and line-level. The AV30MX-2 does not include a pre-amplifier. Refer to the next section on the proper wiring for the 3.5mm and RCA inputs.

2.4.1 Input Connection Diagrams

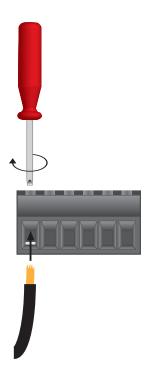

2.5 Output Connections

Stewart Audio recommends using high-quality, heavy-gauge speaker wire and connectors to send the output signal of your amplifier to the speakers. Use the following table as a guideline when selecting your wire gauge.

Distance	Wire Gauge
Up to 25 ft.	16 AWG
26-40 ft.	14 AWG
41-60 ft.	12 AWG

Speaker leads connect by means of terminal block connectors supplied with the unit. Strip speaker leads 1/4" and insert into connector observing proper polarity. With a small, flat-blade screwdriver, tighten the screw until the leads are held securely in place. Inspect for possible shorts or broken wires.

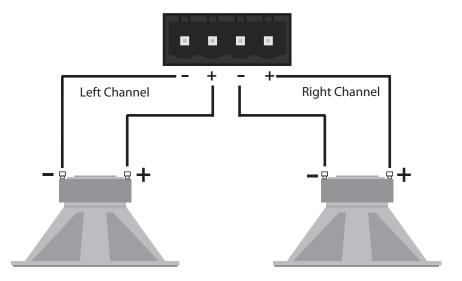

2.5.1 Speaker Configuration

The AV30MX-2's two stereo input channels are mixed and then sent out to the left and right speakers. The expect speaker setup as a typical 80hm or 40hm configuration (not to exceed 30W per side).

Once you have wired your terminal block connectors with the instructions in **section 2.5**, use the following diagram as a reference for connecting your speakers.

Output Connector (Rear of AV30MX-2)

3 Operation

3.1 Operating Precautions

- Before use, your amplifier must be configure for proper operation, including input and output wiring hookup. Improper wiring can result in damage to equipment or potentially harm to the operator. Consult section 2 for setup instructions.
- 2. Tampering with the circuitry, or making unauthorized changes is not only dangerous but may also violate local regulations.
- 3. Use care when making connections between the amplifier and the input or output equipment. Using equipment that is not capable of handling the output wattage may lead to permanent damage.

NOTE: Stewart Audio will not be held responsible for damage to your AV30MX-2 or connected equipment if the instructions in this manual are not followed.

3.2 Controls, Indicators, and Connectors

- 1 Speaker Output Connector
- 2 Remote Mute
- Power Connector
- 4 Channel 2 Level Knob
- Channel 1 Level Knob
- 6 Channel 2 Input (RCA)

- 7 Channel 1 Input (3.5mm
- 8 Power Indicator LED
- Olip Indicator LED (Left)
- 10 Clip Indicator LED (Right)
- 11 Signal Present Indicator LED

3.2.1 Indicators

The AV30MX-2 has 4 rear panel LED indicators. The first is the power indicator which will illuminate when power is supplied to the amplifier. The next 2 LED indicators are the "Clip" indicators, one for each output channel. These lights will indicate that one of the input signals is too "hot" and will sound distorted when amplified. To fix this, the gain should be reduced at the preamp or mixer level. The final light is the signal present LED which will illuminate when signal is detected on either one of the input connection channels.

3.2.2 Controls

All AV30MX-2 controls are located on the rear of the unit. There is no power switch so the AV30MX-2 will turn on whenever power is supplied to it. The AV30MX-2's Signal Sense Technology (SSTTM) will power up the amplifier from sleep when a signal is detected. After 5 minutes without an input signal the amplifier will go into sleep mode.

The rear panel contains a volume control for each input channel . The amplifier is set to run off of a line-level source and the level should be adjusted for optimum performance. To adjust this knob, you will need a small flat-head screwdriver. While a typical program source level is present, spin the rotary knob as far clockwise as you can without hearing distortion or without the "Clip" indicator illuminating. If the signal is distorting and the knob is all the way counter-clockwise, adjust the gain down at the source level.

3.2.3 Remote Mute

The AV30MX-2 can be remotely muted when needed for such applications as muting during a fire alarm. To do so, 5-12VDC should be applied to the terminal block labeled "MUTE" on the rear of the AV30MX-2. Polarity should be observed when connecting the triggering power source as the amplifier will not be muted if polarity is reversed.

4 Troubleshooting

Problem: Power indicator does not turn on.

Procedure: Check that the amplifier is plugged into a live outlet. After you have ensured that it is not a power issue, disconnect any speakers. If the amplifier turns on after a few seconds delay, then the problem is in the output connection. Check wiring and speakers for short circuits.

Problem: No output on one or both channels; Power indicator is lit.

Procedure: Check that level controls are not turned down. Check that input and output connections are secure. Ensure signal present LED is flashing to denote a signal. If there is no signal detected check signal source and that level controls are set high enough.

Problem: Amplifier overheats and/or shuts off.

Procedure: Review **section 2.3** on proper cooling procedures. Check the signal lights on the rear of the amplifier to see if the signal is overdriving (the signal light flashes red frequently). Overdriving the amplifier for extended periods of time can cause a thermal shutdown.

Problem: Output sound is distorted or cracking.

Procedure: Check all cables for damage or loose connections and reduce the gain on the input signal at the mixer or preamp level. Replace the cables and loudspeakers temporarily to see if this resolves the problem. If problem still exists, contact your Authorized Dealer for service.

5 Technical Specifications

Maximum Output 30Hz - 20kHz	
Stereo	30W @ 8Ω per channel
	30W @ 4Ω per channel
Frequency Response (+0, -3 dB)	30Hz-20kHz
Bandwidth +/- 3.0dB	30Hz-30kHz
THD+N	<0.1% at 1W
Signal to noise ratio	>100dB
External Mute	5-12VDC
Slew Rate	30V/ms
Input Sensitivity	0.5V (-3 dBV)
Standard Voltage Gain	28X (26.5dB)
Input Impedance (Unbalanced)	10k Ohms
Sleep, Idle Current Draw, 1/8 Draw	0.005/0.01/0.15 Amps
Class	D
Input Connectors	3.5mm Stereo, Dual RCA
Output Connectors	Euro Block
Power Supply	External In-Line 48DVC
Cooling	Convection-Cooling
Controls	2 Independent Level Controls
LED Indicators	Power, Signal Present & Clip
Construction	Aluminum Chassis
Dimensions	
Height	1.25in (3.2cm)
Width	4.35in (11.1cm)
Width Depth	4.35in (11.1cm) 3.2in (8.1cm)

Stewart Audio reserves the rate to change features and specifications without notice.

6 Warranty Information

6.1 Warranty Summary

All Stewart Audio amplifiers and accessories, unless excluded in this summary, are covered by a 3-year limited warranty on parts and labor from the data of purchase. In order to be eligible for warranty repairs, the amplifiers and accessories must have been purchased through an authorized Stewart Audio dealer and submitted by the original purchaser. This warranty is only valid in the country in which the amplifier was purchased.

6.1.1 Eligibility Requirements.

Stewart Audio warrants against all malfunctions which come as a result of component or manufacturer defect. The amplifier is also covered from all failures which arise during the warranty period (3 years from date of purchase) that are not a result of misuse. The following actions will void your warranty:

- The power cord or AC plug has been damaged through misuse.
- The amplifier has been exposed to moisture or extreme temperatures.
- The amplifier has been dropped, items have been dropped on the amplifier, or the enclosure has been damaged.
- The amplifier has been opened by the operator.
- The amplifier was improperly packaged when sending to the factory for repair, resulting in damage.
- Any of the precautions or instructions found in this manual were not followed.

Damages resulting to the amplifier which are not covered under this warranty can be factory-repaired at cost to the customer. Use the contact information below to initiate the repair process.

6.2 Return Procedure

This section includes the return procedures which must be followed in order to prevent processing delay or cost to the customer. Please read the entire section before contacting Stewart Audio for returns.

6.2.1 Return Authorization Number

All returns to the factory for service must be accompanied by a Return Authorization (RA) number. One can be obtained by contacting Stewart Audio at (209) 588-8111 or via e-mail at support@stewartaudio.com.

NOTE: Any defective products received without an RA number will be returned to sender at their expense.

If Stewart Audio is unable to contact the sender in 14 days, the merchandise will be considered scrap and may be disposed of.

6.2.2 Shipment Instructions

If Stewart Audio requests that you ship the defective product back to their service center, please refer to the guide below. To ensure prompt warranty service, be sure to follow all instructions.

- 1. Return Authorization (RA) is required for product being sent to the factory for service.
- 2. See packing instructions in section 6.2.3.
- 3. Ship the defective product using a method which provides for order tracking or order confirmation. The service center is located at the following address:

Stewart Audio 14397 Cuesta Court Suite D1 Sonora, CA 95370

- 4. Use a bold black marker and write the RA number on three sides of the box.
- 5. Record the RMA number for future reference. The RA number can be used to check the repair status.

6.2.3 Packaging Instructions

Should Stewart Audio request that you ship your product to their service center, these instructions must be followed in order to ensure safe delivery. If they are not followed, Stewart Audio assumes no responsibility for damaged goods and/or accessories that are sent with your unit.

6.2.3 Packaging Instructions (cont.)

- 1. Please write the RA number on three sides of the box. Include the Stewart Audio RA number inside the box and a brief description of the problem.
- Do not ship any accessories (manuals, cords, hardware, etc.) with your unit. These items are not needed to service your product. Stewart Audio will not be held responsible for these items if they are returned with the amplifiers.
- 3. When shipping your amplifier, it is important that it has adequate protection. We recommend you use the original packing material when returning the product for repair. If you do not have the original box, see number 4.
- 4. If you provide your own shipping pack, the minimum recommended requirements for materials are as follows:
 - a. 275 P.S.I. burst test, Double-Wall carton that allows for 2-inch solid Styrofoam on all six sides of unit or 3 inches of plastic bubble wrap on all six sides of unit.
 - b. Securely seal the package with an adequate carton sealing tape.
 - c. Do not use light boxes or "peanuts".

NOTE: Damage caused by poor packaging will not be covered under warranty.

6.2.4 Estimate Approval

An estimate for all non-warranty repairs will be provided to the customer once the unit has been shipped to the factory. The customer is responsible to approve this estimate within 7 days. If the repairs are not approved within 14 days, Stewart Audio reserves the right to consider the unit scrap and may discard it.

6.2.5 Payment of Non-Warranty Repairs

Payment for non-warranty repairs must be submitted to Stewart Audio before the product will be returned to the customer.

7 Accessories

The following accessories are available from Stewart Audio for your amplifier.

All part numbers shown are Stewart Audio Part Numbers.

Mounting Brackets

AV-POLE Pole-mount bracket for AV Series amplifiers

AV-BRACKET Universal mounting bracket for AV Series amplifiers

Connection Adapters

ADPT-RCA Mono Female RCA to male Euroblock.

ADPT-SUMRCA Stereo Female RCA to male Euroblock.

ADPT-SUM35 Stereo Female 3.5mm to male Euroblock

Wall Plates

WP-RVC-B Wallplate with 10k potentiometer and knob for re-

mote volume control (Black)

WP-RVC-A Wallplate with 10k potentiometer and knob for re-

mote volume control (Aluminum)
